WHS Training & Consulting Specialists

SPECIALISED WHS RISK ASSESSMENT COURSE

Aim The course aims to provide or improve the knowledge and skills of participants to identify, assess and control the WHS risks in your workplace. Your participants will use your documentation on your hazards and are trained with a view to implementing what is needed in your workplace to help eliminate/minimise WHS risks and maintain/review effective risk controls as required by the WHS Act sections 17–19, and WHS Regulation clauses 32-39.

Objectives On completion of this practical course, participants should be able to:

1. Define a hazard and explain what 'risk' means.
2. Explain their legal duty to eliminate or minimise WHS risks.
3. Carry out an effective inspection of their workplace and recognize and understand the hazards that are there.
4. Use the client's risk assessment tools or a risk management process based on the SafeWork NSW Code of Practice How to Manage WHS Risks, to:
(i) assess the hazards they identify, and
(ii) determine how to eliminate or control the risk.
5. Make recommendations to manage the risks through eliminating or minimising risk using the mandatory hierarchy of control measures and to maintain and review those risk control actions as required by clauses 36-38 of the WHS Regulation.
6. Draw up an action plan to implement their recommendations.

Implementation This course contains minimum theory content and maximum practical application that focusses on what the participant needs to do about eliminating or minimising WHS risk in their workplace.

Duration 1 day, 9am to 4pm.

Trainer An experienced and qualified Work Health and Safety trainer.

Cost \$2200 + GST (\$2242 incl. GST), up to 16 employees.
Note. Travel costs may apply in some situations in addition to the course fee for the onsite course)
